

Town of Brookline Conservation Restriction Policy

A cooperative effort of the Board of Selectmen, the Conservation Commission and the Board of Assessors has resulted in the adoption of a Conservation Restriction Policy in December 2008. The policy is intended to promote the protection of the environment, including open space, scenic areas, clean air, pure water resources, and the natural habitat of wildlife and plants. The policy is designed to work in concert with the Town's 2005 Open Space Plan and Massachusetts General Laws, Chapter 184, §§31-33.

The benefits of a conservation restriction are presented on the [Park & Open Space](#) Web-page in the Conservation Section. A copy of the [Conservation Restriction Policy](#) is attached.

Abutter's Lists

Brookline's Web-based GIS application allows users to request abutter's information and request an abutter's list. Use this link to access the [Abutter's List - GIS application](#) .
